

Technology-enhanced learning

With the convergence of technology in education, institutions are experiencing major changes in the way they deliver knowledge, share research, access information and communicate with students.

Faced with new paradigms for teaching both inside and outside of the classroom, leading higher education institutions have turned to the patented Mediasite webcasting platform to deliver technology-enhanced learning.

Mediasite records your instruction and webcasts it live over the internet, automatically. Learners can then watch in real-time, later on-demand or listen to podcasts on-the-go.

Types of technology-enhanced learning

- Blended learning to enhance traditional classroom instruction by using multiple learning methods
- E-learning to deliver and facilitate education solely via electronic means
- Distance learning to deliver classroom content to students in different geographic locations

Popular applications for Mediasite

- Online lectures: material review, guest lectures, blended and distributed learning, continuing and adult education programs, e-learning
- Student projects: student teaching, digital portfolios, group presentations
- Professional development: faculty training, research, seminars
- University business: recruitment, orientation, leadership meetings, alumni relations

“Imagination knows no bounds. Mediasite is revolutionizing how we can manage and distribute information to people on campus and at a distance. This product is enhancing communication within our college and reaching audiences we never imagined.”

> Bill Havice, Associate Dean, Clemson University

Improve learning outcomes

- Improve comprehension and retention as students review recorded lectures from any location
- Extend knowledge on a broader scale, independent of traditional classroom tools
- Appeal to a variety of learning styles by integrating rich media
- Provide an accurate online representation of the in-class experience

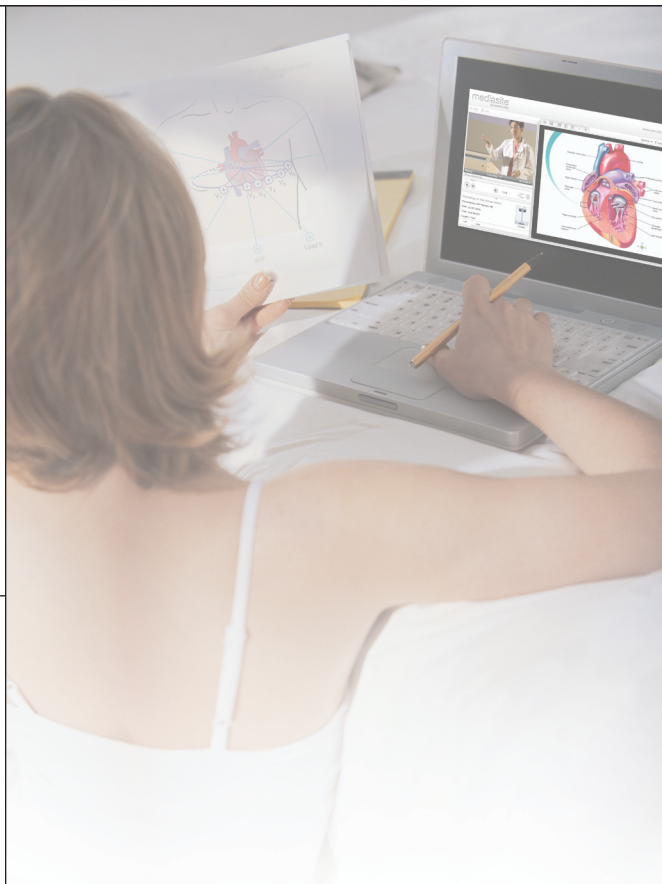

Deliver instruction anytime, anywhere

- Access course material anytime, anywhere
- View single lectures or entire courses live and on-demand in a user-friendly, online environment
- Generate instant knowledge libraries you can easily manage, search and secure
- Enable teachers to present online without altering their natural teaching styles

Get the technology edge

- Meet the demands of both media-savvy students and tenured educators
- Offer optimal learning experiences regardless of location or geography
- Recruit the best and brightest students and faculty
- Increase enrollment by reaching new audiences without adding facilities or staff
- Generate new revenue from campus facilities
