hosting

3 Viewers anywhere

Our Hosting Services give you a fast, reliable and cost-effective way to webcast without infrastructure hassles. Easily share your multimedia presentations online – whether live or archived – without investing in network hardware, bandwidth and personnel.

Get started now

- Enjoy a low-risk way to put your knowledge online using Mediasite
- Effortlessly kick-start your webcasting initiatives
- Experience a stress-free, pay-as-you-go solution
- Customize your hosting package around the number of presentations and viewers you anticipate

Avoid technical headaches

- Minimize IT challenges and network infrastructure issues
- Avoid expensive hardware, data center and bandwidth investments
- Leverage our infrastructure, built for high availability
 - Redundant telecommunication services and firewalls
 - Multiple independent internet connections
 - Load balanced servers
 - 24x7 data center monitoring, environmental controls and power failure protection

Ramp up without risk

- Rest assured your content is secure in a redundant, fault tolerant environment
- Customizable configurations meet even the most demanding bandwidth needs
- Create a quality viewing experience for any user regardless of geographic location

How it works

1. You capture your lectures, briefings or training sessions as they occur with a Mediasite Recorder.

- RL Recorder for room-based recording
- ML Recorder for mobile event recording

2. Sonic Foundry hosts the servers that webcast your content. You can webcast live and archive for on-demand viewing, and get anytime access to manage your online catalogs through the Mediasite Management Portal.

- Customize viewer interfaces
- Create custom catalogs
- Moderate live Q&A forums and issue viewer polls
- Add presentation closed captioning
- Edit recorded presentations
- Report on presentation viewing activity
- Manage presentation security

3. Viewers watch your presentations anytime, anywhere with their favorite web browser.
