Mediasite ML Recorders

Mediasite Recorders are designed with your speakers and instructors in mind - letting them present as they are most comfortable while automatically capturing everything said and shown. Viewers experience the highest quality live and on-demand streaming to any device, from laptop or computer to all popular mobiles.

Combined with Mediasite Enterprise Video Platform, Mediasite Recorders provide a rock-solid webcasting and video content management platform to record, archive, search, analyze and secure your organization's important knowledge and event content.

Mediasite ML Recorders are ideal for on-the-go webcasting, live events, guest speakers, conferences and tradeshows. The rugged, portable design moves easily from location to location and can be set up and ready to record in only a few minutes.

Easy to use

- "Plug and present" design for rapid setup and immediate recording
- One-button or fully-automated recording
  - Operator-free start/stop recording schedules
  - Remote web-based recording
- No pre-uploading of presentation materials
- Pause and resume any live or on-demand recording
- Video and slide confidence monitors for error-free recording

Live and on-demand streaming

- Record content from any source - laptop, tablet, whiteboard, document camera video conference and more
- Webcast live from anywhere
- Record on-demand content for users to watch at any time
- Archive presentations in searchable Mediasite Catalogs (requires Mediasite EX or Mediasite Hosting)
- Publish to DVD/CD, USB or zipped folder to watch without an internet connection
- Microsoft® Smooth Streaming support
- Encoding from 56Kbps to 4Mbps

Presentation editing

- Crop, cut and replace video
- Add, delete, or replace presentation slides
- Adjust slide timings
- Add and customize chapters
- Editing history with ability to revert to a previous revision

Recorder Management

(requires Mediasite Enterprise Video Platform)

- Via the web, access and remotely control any Recorder - start/stop/pause, slide advance, capture settings, content publishing and more
- Confidence monitoring of each recorder's audio, video and image signals
- Start/pause/stop/shutdown recording
- Control slide advance functions
- Centralized Recorder software updates

Interactive playback

- Watch on any device – PC, Mac®, iPad®, iPhone®, iPod®, Android®, BlackBerry® or Linux®
- User-controlled layouts, thumbnail navigation and chapters
- Powerful keyword search
- Custom branding and links to related materials
- Presenter-viewer interactivity with polls and ask a question
- Closed captioning support
