

Mediasite Recorder Control Center

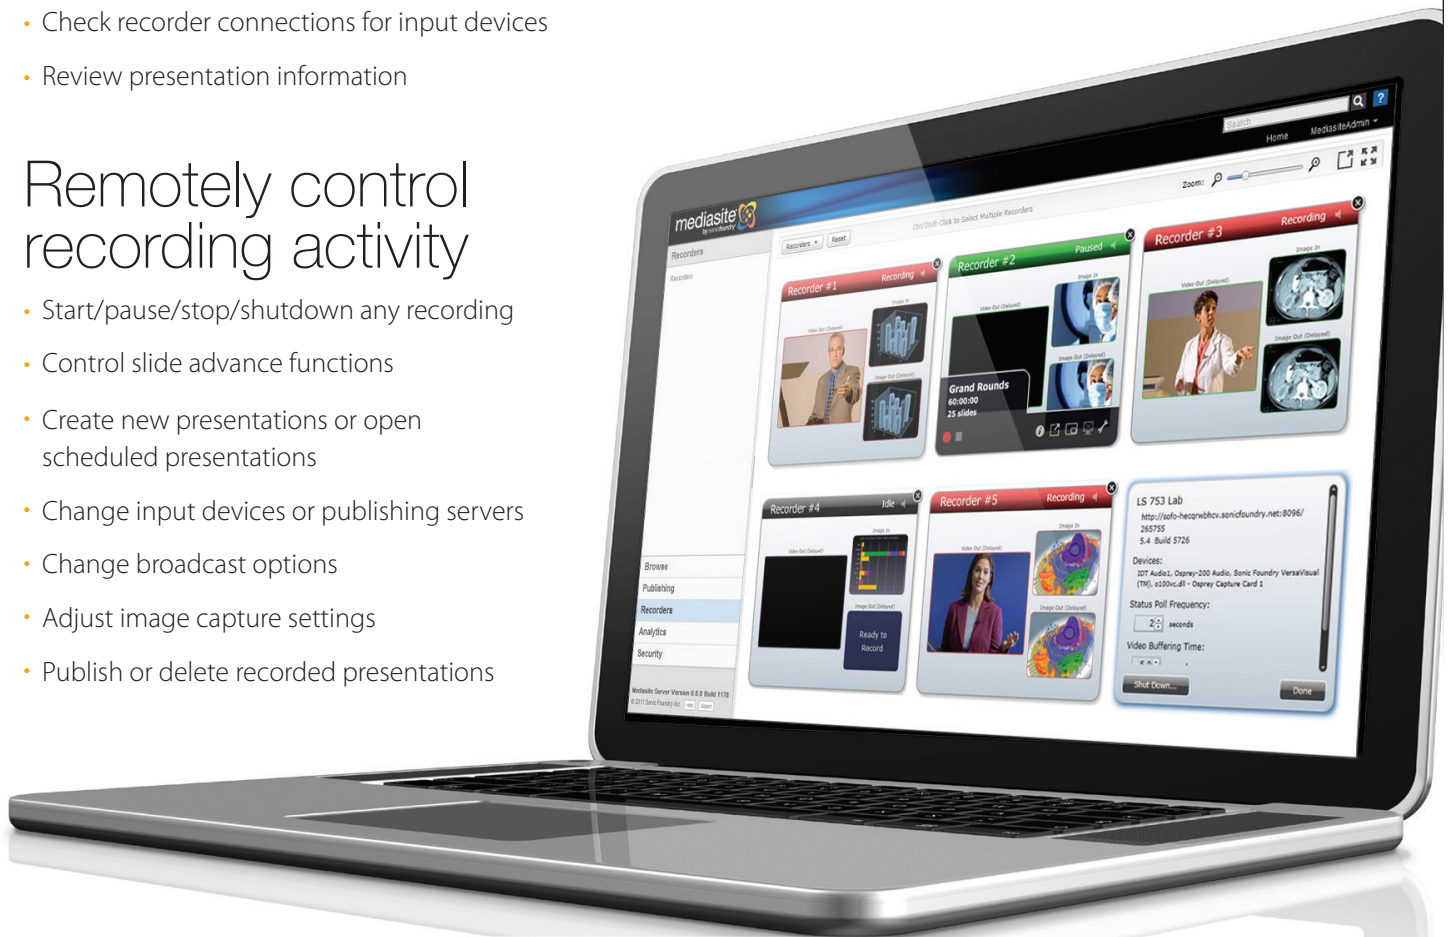

Mediasite Recorders are the cornerstone of your webcasting or lecture capture platform, reliably capturing and streaming high quality multimedia content both live and on-demand. As your recording frequency and volume increase, the Mediasite Recorder Control Center provides a single dashboard to monitor and control any recorder activity across your campus or enterprise. Conveniently accessed from your Mediasite Management Portal, the Control Center lets you maximize your recording efficiency while maintaining a continuous view of your organization's webcasting activity.

Monitor status

- Simultaneously track status and recording activity for any number of Mediasite Recorders
- See confidence monitors for each recorder's audio, video and image signals
- Check recorder connections for input devices
- Review presentation information

Remotely control recording activity

- Start/pause/stop/shutdown any recording
- Control slide advance functions
- Create new presentations or open scheduled presentations
- Change input devices or publishing servers
- Change broadcast options
- Adjust image capture settings
- Publish or delete recorded presentations
