

What's new in Mediasite 6

The best webcast experience – now the most portable

Introducing the broadest range of live mobile streaming from a professional-grade webcasting appliance and rich media management platform.

- Watch any Mediasite presentation on your iPad®, iPhone®, iPod®, Blackberry® or Android® device
- Auto-device detection for optimal playback experience on your mobile device, Mac® or PC
- Touch screen gestures for presentation control and navigation
- Playback using HTML5

H.264/AAC recording and adaptive streaming for superior playback

Adaptive streaming optimizes Mediasite playback by switching video quality in real-time based on available bandwidth and device capabilities.

- Live and on-demand streaming using Microsoft® Smooth Streaming
- Live broadcast for iOS devices
- Support for HD resolutions up to 720p

System-wide search

Search for any word or phrase in a single presentation, in a presentation catalog and now across your **entire** Mediasite library.

- Every keyword search scans
 - Indexed slide text
 - Presentation metadata – titles, descriptions, presenters, etc.
 - Closed caption transcripts, if available
- Search results automatically play the presentation where the search term occurs
- Guided search intuitively filters search results

Search engine optimization for public content

All Mediasite content can now be optimized for indexing by search engines, making it easier for people to find your publicly-available content based on the presentation metadata, slide text and closed captions (if available).

Web-friendly mini player

This convenient, resizable player easily embeds Mediasite content on blogs and web pages. Viewers can choose to watch content right on the page or launch the full-size player.

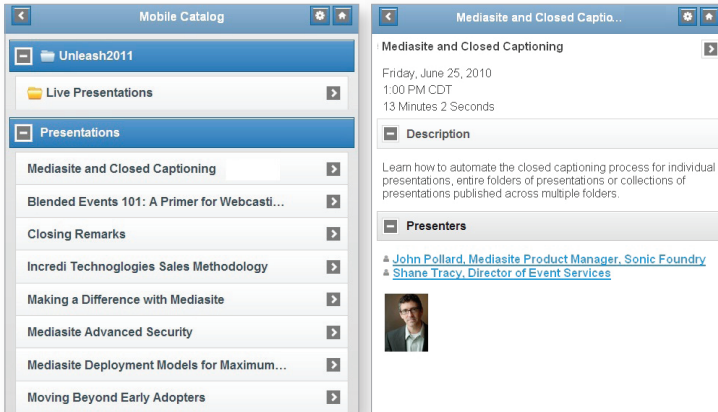

Enhanced screen reader mode

With a single keyboard shortcut, visually impaired users easily enable any Mediasite presentation, in any Mediasite Player, for screen readers like JAWS® or Window-Eyes.

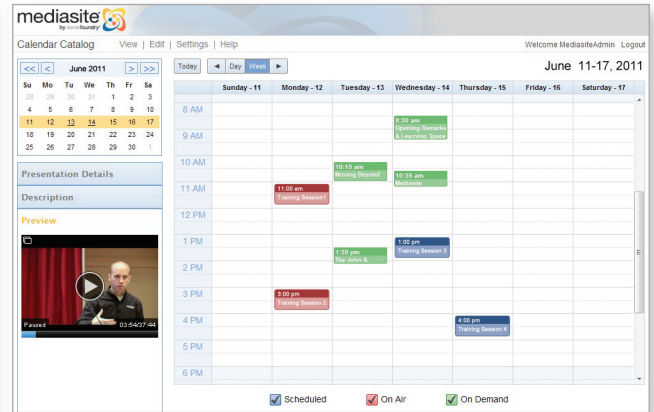

More Mediasite Catalog options

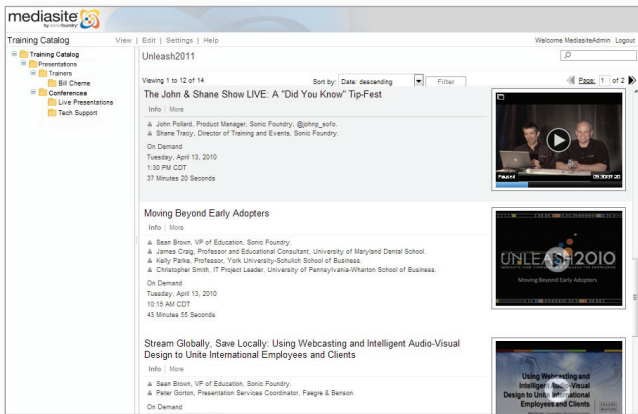

Mediasite 6 adds several new layouts to its library of automatically-generated catalogs. Plus, video preview now lets you watch webcasts within a catalog page.

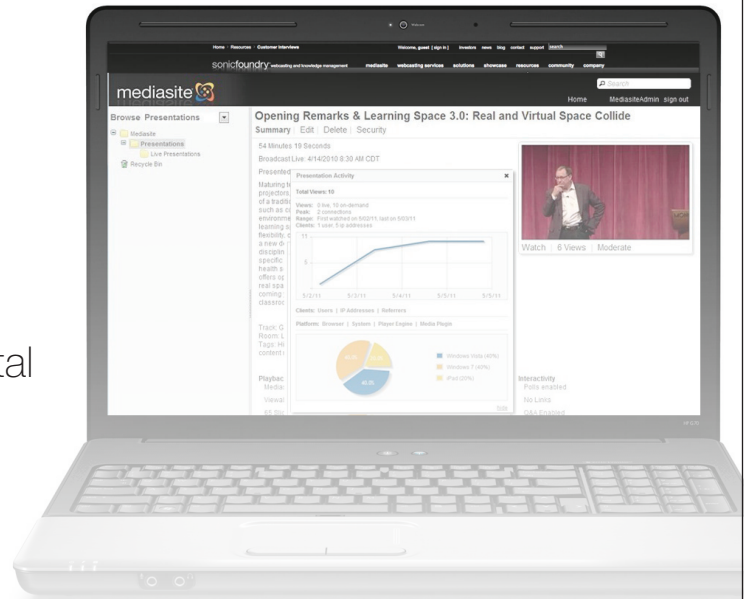

Mobile | Designed specifically for tablets and other handhelds, but can also be used with any browser

Calendar | Outlook-style view of all webcasts, color-coded as scheduled, on-air or on-demand

Video Preview | Updated layout for Mediasite's out-of-the-box catalog

Enhanced Mediasite Management Portal

New content management, reporting, viewing and security features in the Mediasite 6 platform:

- Webcast previews on all presentation summary pages
- New Mediasite widgets for reports, polls and moderation
- On-the-fly presenter profile creation
- In-portal editing of presentation slide titles and descriptions
- Link to external survey or polling systems
- New Mediasite Explorer view streamlines content organization, management and navigation

Presentation and catalog registration

In addition to the robust viewing permissions available for any Mediasite presentation or catalog, forms with custom registration fields can now be added requiring viewers to enter information about themselves before watching secure content.
