

Mediasite Building Block™ for Blackboard Learn™

Mediasite is today's leading solution for online learning across college campuses and universities – empowering educational institutions to easily record and automatically put their lectures online. Mediasite quickly and cost-effectively delivers instructors' presentation content with fully integrated video, audio, and supporting lecture materials to students both on- and off-campus. Designed for educators, Mediasite provides a completely automated platform for e-learning, distance learning, faculty development, research and recruiting.

Now with the Mediasite Building Block for Blackboard Learn, any Mediasite-recorded lecture, presentation or meeting on campus, whether live or archived, can be published to the Blackboard Learn platform. Students have convenient, anytime access to their instructors' rich media presentations directly from their managed courses within Blackboard Learn – including fully-synchronized audio, video and presentation materials from PowerPoint and electronic whiteboards to document cameras or other presentation devices. Off-campus students can access multimedia lectures that replicate the in-class experience. And viewing mediasited lectures within Blackboard Learn requires nothing more than the student's web browser.

Mediasite and the Mediasite Building Block for Blackboard Learn empower instructors to create richer interactive learning experiences and tailor their instruction to enhance student outcomes. Instructors do not need to modify how they present and do not need to learn any new software. Because the Mediasite Building Block integrates transparently with the familiar Blackboard Learn platform, adding multimedia content to courses is quick and easy.

Engage students

- Encourages deeper lecture engagement and classroom interaction without the worry of potentially missing important notes
- Provides convenient anytime access to course content
- Reinforces learning with recorded lectures available as post-class study tools
- Improves information retention by allowing students to review at their own pace
- Requires only a web browser to watch rich media presentations

Empower instructors

- Supports teaching without learning new software or changing normal lecturing styles
- Provides remote students the same in-class lecture experience
- Meet students' demand to capture and preserve the classroom experience as a study resource
- Tracks students' lecture viewing activity showing who watches what, when and enables further analysis for correlation to improved learning outcomes

System requirements

- Blackboard Learn Platform 7.2 or later on Linux®, Solaris™ or Microsoft® Windows Server®
- Mediasite EX Server 5.0.1 or later
