Mediasite RL Recorders

It's proven. Mediasite's time-tested recording appliances and schedule-based workflow speed user adoption, cut publishing delays and minimize support requirements . There's no easier way to capture the growing amount of valuable knowledge and expertise that powers your video and rich media library. Instructors and speakers continue to present as they are most comfortable, confidently knowing that Mediasite Recorders automatically capture everything they say and show. And viewers experience the highest quality live and on-demand streaming to any device, from laptop or computer to all popular mobiles. Combined with Mediasite Enterprise Video Platform, Mediasite Recorders provide a rock-solid webcasting and video content management platform to record, archive, search, analyze and secure your important content.

Mediasite RL Recorders are ideal for lecture halls, smart classrooms, conference or training rooms and auditoriums, integrating with Crestron®, AMX™ and Mediatech room control systems. Plus, integration with all existing AV and educational technology means unmatched scalability throughout your campus or enterprise

Easy to use

- One-button or fully-automated recording
  - Integration with room control systems
  - Operator-free start/stop recording schedules
  - Remote web-based recording
- No pre-uploading of presentation materials
- Pause and resume any live or on-demand recording
- Video and slide confidence monitors for error-free recording

Live and on-demand streaming

- Record content from any source - laptop, tablet, whiteboard, document camera video conference and more
- Webcast live from anywhere
- Record on-demand content users can watch any time
- Archive presentations in searchable Mediasite Catalogs (requires Mediasite EX or Mediasite Hosting)
- Publish to USB or zipped folder to watch without an internet connection
- Microsoft® Smooth Streaming support
- Encoding from 56Kbps to 4Mbps

Presentation editing

- Crop, cut and replace video
- Add, delete, update or replace presentation slides
- Adjust slide timings
- Add and customize chapters
- Editing history with ability to revert to a previous revision

Recorder Management
(requires Mediasite Enterprise Video Platform)

- Via the web, access and remotely control any Recorder - start/stop/pause, slide advance, capture settings, content publishing and more
- Confidence monitoring of audio, video and image signals
- Centralized Recorder software updates

Interactive playback

- Watch on any device – PC, Mac®, iPad®, iPhone®, iPod®, Android™, Blackberry® or Linux®
- User-controlled layouts, thumbnail navigation and chapters
- Powerful keyword search
- Custom branding and links to related materials
- Presenter-viewer interactivity with polls and ask a question
- Closed captioning support
